Patent No. 594524

GENERAL INFORMATION:

APPLICANT: Skatrud, Paul L.

APPLICANT: Radard, Maarten

TITLE OF INVENTION: Maltiple Drug Resistance Gene atrC of

TITLE OF INVENTION: Aspergillus Nidulans

NUMBER OF SEQUENCES: 3

CORRESPONDENCE ADDERSS:

MUMBER OF SEQUENCES: 3

CORRESPONDENCE ADDERSS:

ADDERSSEE: Eli Lilly and Company

STREET: Indianapolis

COUNTY: U.S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length 3927;

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                     US-09-882-694A-10
